## Our professional services include:

- **Data Recovery services**

Laptop recovery, Desktop recovery, Server recovery, RAID recovery and rebuilds, Logical hard drive recovery, Physical hard drive recovery, DLT tapes, LTO tapes, Compact Flash, Jump drives, Quick Books, File Maker, SQL Server recovery, MySQL recovery, Oracle recovery, Exchange recovery, Lotus Domino Recovery, and others...

- **Digital Forensics**

Is the art of gathering digital artifacts from electronic devices such as computers, cell phones and hand-held devices in such a manner that they can be presented in court. This often can be done, even when the devices have deleted or removed the contained data.

- **Expert Testimony**

If you require the services of an expert witness to assist you in the preparation of a case, involving the use of a digital device, we are trained to fulfill this exigency. Our computer forensic examiners have a high level of technical expertise, and are well versed in data storage, data retrieval, data security and electronics.

- **Corporate Training**

Incident response training and preservation of evidence

- **Network Security Consulting**

Security Audits and Penetration testing, Consultation on Intrusion Prevention systems, Cisco Firewalls, Watchguard Firewalls, Application Layer Firewalls and encryption performed by our Certified Ethical Hackers.
