March 30, 2015

Harmony Tech would like to thank Data Analyzers for, once again, saving our client's data. We recently had a client with a NAS device that had physically failed. Not only were they able to recover 100% of the data within a few days, but they did so under budget. Their staff is always extremely knowledgeable and easy to reach.

Harmony Tech has utilized Data Analyzers on multiple occasions when client hard drives had failed. They have been able to recover 100% of the data, every single time. Harmony Tech will continue to utilize Data Analyzers for the foreseeable future and recommend them to clients and non-clients alike.

Respectfully,

A handwritten signature in blue ink, appearing to read "J Russell", is written above the typed name.
